Exp-1

Comparative study of low code development versus traditional application development

Aim:

To compare traditional application development and low code application development based on their feature, advantages and disadvantages

features of traditional vs low code:

Traditional	low-Code
* Required programming languages & knowledge	* minimal coding required.
* Developed using language like Java, Python, C, etc	* uses drag and drop interface
* Longer development time	* Limited customizat
* Suitable for complex applications	* Suitable for sm to medium business application.

Advantages of Traditional and low Code:

Traditional Development:

* Highly customizable
* Suitable for large and complex
* Supports advantages integration

Low-Code Development:

* Faster application development
* Requires less Coding knowledge
* Reduce development Cost

Disadvantages of traditional vs low-code:

Traditional:

* time Consuming
* Requires Skilled developers
* Longer testing and deployment proce

low-code:

* Limited Customization option
* Vendor dependency
* Licensing cost for enterprise platform.

ult:

Thus the Comparison of traditional and w code development has been Completed Successfully.
